INDEX OF AUTHORS

Ananenko, N. H., 573
Anderson, H. W., 409
Anderson, Thomas F., 637, 651, 659
Anker, Herbert S., 249
Auerbach, V. H., 451

Bailey, John Hays, 139, 175
Barker, H. A., 223, 359
Bayliss, Milward, 307
Bellamy, W. Dexter, 147, 153
Benedict, R. G., 286
Berkman, Sam, 545
Bernheim, Frederick, 677, 765
Bhat, J. V., 359
Bhattacharyya, P. K., 409
Bichowsky-Slomnitzki, Leah, 27, 33
Bissell, H. D., 607
Bondi, Amedeo, Jr., 843, 849
Bornstein, B. T., 223
Breed, Robert S., 287
Bruner, D. W., 137, 285, 449, 711
Buchanan, R. E., 287
Budd, Vera, 459
Bugie, Elizabeth J., 555
Byatt, Pamela H., 787

Capps, Beryl F., 869
Carlson, H. J., 235, 241, 607, 615
Carter, H. E., 409
Cavallito, Chester J., 139, 175
Churchill, E. S., 565
Clapper, William E., 277
Clark, P. F., 89
Coburn, Don R., 419
Colmer, Arthur R., 777
Cook, M. H., 573
Crandall, Raymond E., 833
Cravitz, Leo, 115, 127
Cushing, John E., 551

Davis, Bernard D., 11
De Bord, George G., 764
Dietz, Catherine C., 843, 849
Doak, Beatrice W., 373
Doermann, A. H., 257
Douglas, H. G., 235, 241, 607, 615
Dubos, René J., 11
Dufrenoy, Jean, 75, 525, 727

Eagle, Harry, 341, 347
Edwards, P. R., 137, 285, 449, 711
Ehrlich, John, 425
Elvehjem, C. A., 89
Emerson, Mary R., 327
Erb, N. M., 813
Evans, James B., 793

Favour, Cutting B., 1
Fitzgerald, Robert J., 677, 765
Fleischman, Ralph, 341, 347
Florman, Alfred L., 183
Ford, Charles M., 85
Foshay, Lee, 855
Foster, Jackson W., 61, 69, 331, 495, 623
Fox, Sereck H., 869
Frost, Bettina M., 555

Gale, E. F., 161
Gibby, I. W., 855
Gilson, Betty St. C., 801
Glick, David, 307
Goldberg, Joseph, 249
Golub, Orville J., 627
Gottlieb, David, 409
Gray, M. L., 471
Gray, William D., 53
Green, D. E., 451
Gruhzit, Oswald M., 425

Hamilton, Doris M., 197
Hehre, Edward J., 197
Heinmets, F., 823
Henry, Richard J., 545
Hickey, Richard J., 43
Hobbs, Norman L., 869
Horne, Raymond E., Jr., 231
Housewright, Riley D., 545

Ingalls, Mabel S., 115

Jacobs, W. L., 813
Jann, Gregory J., 463, 787
Johnson, Balbina A., 249
Johnson, M. J., 209
Johnstone, Donald B., 317
Joslyn, Dwight A., 425

Katznelson, H., 763
Kearney, E. B., 89
Kivela, E. W., 565
Klimek, John W., 139, 147, 153
Knaysi, Georges, 753

Knight, S. G., 401
Knowles, Thomas, 369
Knox, W. E., 451
Krueger, Keatha K., 683, 693
Kurita, Ikuya T., 277

Lamanna, Carl, 373
Lochhead, A. G., 579, 763
Luckiesh, Matthew, 369

McLean, I. William, Jr., 425
Maddy, K. H., 89
Mallmann, W. L., 565
Meleney, Frank L., 249
Miller, Pauline A., 421
Miller, Ruth E., 381
Miller, Winston R., 115, 127
Moran, Alice B., 285
Morgan, Banner Bill, 85
Morris, J. Anthony, 419
Mueller, J. Howard, 421
Musselman, Arlyne D., 347

Nagler, F. P. O., 45
Nelson, F. E., 581, 593
Nicholes, P. S., 855
Niven, C. F., Jr., 601, 769
Novak, Ruth, 517

Olson, B. H., 209
Oskay, John J., 667

Pannell, Lolita, 115, 127
Parker, Robert F., 801
Penner, Mildred A., 425
Peters, I. I., 581, 593
Peterson, W. H., 683, 693
Plass, B. A., 89
Pollard, Arthur L., 231
Pond, W. L., 89
Pratt, Robertson, 75, 525, 727

Quan, S. F., 25

Rake, Geoffrey, 45, 667, 865
Reid, Evans B., 551
Reynolds, Donald M., 739
Riley, W. F., Jr., 471
Robertson, J., 241
Rodwell, A. W., 161
Rosebury, Theodore, 127

St. John-Brooks, Ralph, 287
Salle, A. J., 463, 787
Saphra, Ivan, 561
Schlosser, M. E., 573
Schmidt, Clarence F., 705
Schneierson, S. Stanley, 393
Seligmann, Erich, 561
Sevag, M. G., 381
Shanahan, A. J., 537
Sholl, L. B., 471
Siem, Robert A., 307
Slafkovsky, H., 759
Smith, Robert M., 425
Solotorovsky, Morris, 555
Spray, Robb Spalding, 79, 839
Sprince, Herbert, 169
Squire, Edward N., 766
Squire, Esther W., 766
Stafseth, H. J., 471
Stanier, R. Y., 477
Stansly, P. G., 573, 721
Stodola, F. H., 286
Strait, Louis A., 75
Stumpf, P. K., 451

Tamura, J. T., 855
Tanner, F. W., 537
Tanner, William A., 115, 127
Thorp, Frank, Jr., 471

Vera, Harriette D., 531

Wagner, John C., 627
Waksman, Selman A., 317, 739
Ward, B. Q., 113
Washburn, Mary R., 601, 769
Weil, A. J., 759
West, Mary G., 711
White, J. C., 601
Wilson, P. W., 517
Wisthoff, R. T., 813
Wynne, E. Staten, 61, 69, 331, 495, 623

Youmans, Anne Stewart, 503

INDEX OF SUBJECTS

Adaptive enzyme formation inhibited by streptomycin, 765
Aerobacter aerogenes producing butylene glycol, 209
Age of culture affecting delay of sulfonamide inhibition, 503
Alcohol tolerance of yeast, 53
Amino acid, L-form, oxidase of molds, 401
— acids inhibiting *Streptococcus bovis*, 769
— acids stimulating related species differently, 277
Amylase production by submerged aspergilli, 813
Amylo process modification, 813
Antibiotic action, model and reversal of, 175
— from *Asarum canadense*, resistance to, 139
— from *Leptotaenia dissecta*, 615
— from plants, 607, 615
— from plants, extraction methods, 235
— from plants, results, 241
— from sumac, 607
— from *Streptomyces* 8–44, 409
Antibiotics, acquired resistance to, 139, 459, 463
—, identification by resistant strains, 721
—, thiol-inactivated, 175
—: bacitracin manufacture and properties, 249
—: chloromycetin, 425
—: grisein from *Streptomyces griseus*, 739
—: penicillin mechanism of action, 727
—: polymyxin assay method, 286
—: subtilin assay method, 545
—: *see also* Bacitracin, Chloromycetin, Gliotoxin, Grisein, Penicillin, Polymyxin, Streptomycin, Subtilin
Antibiotics-resistant strains, 459, 463
Antigenic structure of bacterial spores, 373
— studies of paracolon bacteria, 711
Ascospore germination of *Neurospora*, activation of, 327
Aspergillus niger, amylase production in submerged culture, 813
Azotobacter, mode of N-fixation, 517

Bacillus cereus spoiling eggs by lecithinase, 777
— *larvae*, nutritional requirements, 763
— *mycoides*, spore germination in N-free medium, 753
— *polymyxa* producing polymyxin, 286, 573
Bacitracin, manufacture and properties, 249
— suppressing syphilis, 341, 347
Bacteriophage, inheritance of adsorption cofactors, 651
—, resistance to determined by metabolism, 651
— adsorption cofactors, discussion of, 637
— adsorption cofactors, inheritance of, 651
— adsorption depending upon pH, temperature, tryptophan, 637, 659
— inhibitors, 257
Bacteriostasis by carboxylmethoxylamine, 1
— by diamidines, 27, 33
— by sulfonamides, cause of delay, 503
— by tween, 11
Bacteriostatic action of sulfa compounds increased by neutral chemicals, 277
Bacterium globiforme, chromogenic relatives of, 579
— *tularense* cultivated on blood cell extract, 855
Benzoate derivatives oxidized by *Pseudomonas*, 477
Biotin metabolism in *Lactobacillus pentosus*, 693
Blood fractions required by *Trichomonas vaginalis*, 169
Butylene glycol formation by *Aerobacter aerogenes*, 209

Carbon dioxide needed for spore germination, 331
Carboxylmethoxylamine, bacteriostasis by, 1
Cationic detergents do not kill spores, 565
Chlorine, mode of bactericidal action, 451
Chloromycetin, manufacture, efficiency, and pharmacology of, 425
— identical with streptomycin 8–44, 409
Cholesterol and derivatives affecting bacterial growth, 767
Chromatographic streptomycin detection, 231
Chromogenic species related to *Bacterium globiforme*, 579
Clostridium botulinum, physiology of spore germination, 61, 69, 331, 495
— *gummosum* n. sp., 839
— identification by granulose reaction, 79
— *kluyveri*, synthetic medium for, 223
— *microsporum* n. sp., 839

— *nauseum* n. sp., 839
Cobalt salts enhancing penicillin action, 75, 727

Desthiobiotin metabolism in *Lactobacillus pentosus*, 693
Detergents adhering to washed glassware, 43
Donovania granulomatis, antigenic relationships, 865
— *granulomatis*, cultural characteristics, 667
Dormancy of spores due to inhibitors in media, 623

Electron microscope for diagnosing virus diseases, 45
Electrophoretic mobility of spores, 561
Encephalomyelitis less severe with tryptophan deficiency, 89
Endocarditis streptococci, serology of, 393
Enterobacteriaceae, paracolons, Bethesda group, antigens of, 711
Enterococcus, serology of, 393
Escherichia coli: fusiform cells by penicillin, 537
— *coli:* lysis inhibition of bacteriophage, 257
— *communior*, subtilin-resistant strain, 463

Fat in yeast decreasing alcohol tolerance, 53
Ferrets, *Salmonella typhi-murium* isolated from, 419
Folic acid assay, dehydrated medium for, 869
Furfural activating ascospore germination of *Neurospora*, 327
Fusiform cells of *Escherichia coli* by penicillin, 537

Glassware bacteriostatic by adhering detergents, 43
Gliotoxin, acquired resistance to, 139
Gomori staining method applied to bacteria, 307
Granuloma caused by *Donovania granulomatis*, 667
Granulose reaction by clostridia, 79
Grisein, an antibiotic, 739

Hydroxylamine theory of N-fixation improbable, 517

Immune serum effect on bacterial metabolism, 381
Influenza virus changing chicken erythrocytes, 183
— virus interacting with red cells, 823
Inhibitors of bacteriophages, 257
— of spore germination present in many media, 623

Japanese beetle larvae: cultivation of *Bacillus larvae*, 763

Lactobacillus pentosus, nutritional requirements, 683, 693
Lecithinase of *Bacillus cereus*, 777
Leptotaenia dissecta, antibiotic from, 615
Lipase, properties of, 593
—, staining method for intracellular, 307
— as inhibitor in media containing esters, 11
— bioassay, 11
— formation by *Mycotorula lipolytica*, 581
Listerella isolation technique, 471

Malleomyces morphology, culture, and viability, 115
— virulence and infectivity, 127
Meningitis caused by *Mima polymorpha*, 764
Mima polymorpha causing meningitis, 764
Mutations induced by penicillin, 153, 161
Mycobacteria reaction to NaF, 677
Mycobacterium culture with tween, 11
— *phlei* variant resistant to subtilin, 463
— *ranae* variant requiring streptomycin, 459
— *tuberculosis*, penicillin sensitivity, 555
Mycotorula lipolytica, conditions of lipase formation, 581
— *lipolytica*, description of lipase, 593

Neisseria gonorrhoeae, simple medium for, 531
— producing starchlike polysaccharide, 197
Neurospora crassa, activation of ascospore germination, 327
— *crassa* producing pigment with PABA, 551
Newcastle virus changing chicken erythrocytes, 183
Nitrogen-fixation theories, 517
Nomenclature, international code of, 287
Nucleic acid preventing bacteriostasis by diamidines, 33

Oleic acid preventing germination of *Clostridium* spores, 495
Osmotic pressure as possible cause of action of quaternary ammonium compounds, 571
Oxalate decomposition by *Vibrio ozaliticus*, 359

Oxidase of L-amino acid in molds, 401
Oxime theory of N-fixation improbable, 517
Oxybiotin metabolism in *Lactobacillus pentosus*, 693
Oxygen uptake of bacteria affected by immune serum, 381

Paper strip chromatogram for streptomycin detection, 231
Pancreatic digestion of meat for culture media, 871
para-Aminobenzoic acid as pigment factor for *Neurospora*, 551
Paracolon bacteria (Bethesda group), antigenic study of, 711
Penicillin acquired resistance to, 139
—, cytochemical mode of action, 525
—, mechanism of action, 525, 727
— action enhanced by sodium azide, 849
— assay inhibited by detergent-cleaned glassware, 43
— causing morphological changes of *Escherichia coli*, 537
— concentration to inhibit *Mycobacterium tuberculosis*, 555
— effect on phosphatase, 307
— efficiency enhanced by cobalt, 75, 727
— inhibiting penicillinase-producing species, 843
— resistance of endocarditis streptococci, 393
—-resistant *Staphylococcus*, physiological changes of, 153, 161
— suppressing syphilis, 341, 347
Penicillinase assay, 801
— from *Staphylococcus*, characteristics of, 801
—-producing bacteria inhibited by penicillin, 843
Pentamidine as disinfectant, 27, 33
Phage: *see* Bacteriophage
Phosphatase, staining method for intracellular, 307
— affected by penicillin, 307
Pigmentation induced by *Staphylococcus* extracts, 787
Plant antibiotics, 235, 241
Pneumonitis virus interfering with psittacosis virus, 627
Polyamines preventing bacteriostasis by diamidines, 33
Polymyxin assay method, modification of, 286
— production, 573
Polysaccharide formation by *Neisseria*, 197
Protozoa, nutrition of, 169
Pseudomonas species oxidizing aromatic compounds, 477
Psittacosis virus interfering with pneumonitis virus, 627
Pyocyanin, acquired resistance to, 139

Quaternary ammonium compounds do not kill spores, 565

Radioactive phosphorus lethal to *Escherichia coli*, 705
Red cell agglutination by influenza virus, mechanism of, 823
— cell extract for cultivating *Bacterium tularense*, 855
Resistance to ultraviolet increased by preirradiation, 369
Rhus hirta, antibiotic from, 607
Riboflavin production by bacteria increased by sulfathiazole, 833

Salmonella antigens 1, 2, 3, changes induced in, 137
— *chandans* n. sp., 870
— *memphis* n. sp., 285
— O antigens changed by cultivation in H antiserum, 449
— *typhi-murium* isolated from ferrets, 419
— *waycross* n. sp., 561
Screening method for plant antibiotics, 235
Shigella tietê, characteristics of, 759
Sodium azide increasing penicillin action, 849
— fluoride affecting mycobacteria, 677
Spore germination, physiology of, 61, 69, 331
— germination in N-free medium, 753
— germination inhibited by unsaturated fatty acids, 495
— resistance to quaternary ammonium compounds, 561
Spores, aging due to oxidation, 753
—, antigenic structure of bacterial, 373
—, dormancy of due to inhibitors in media, 623
Staphylococci, coagulase-positive, as a homogeneous group, 793
Staphylococcus aureus, acquired resistance of to several antibiotics, 139
— *aureus*, subtilin-resistant strain, 463
— extracts induce pigmentation, 787
Starch favoring spore germination, 495
— preventing dormancy of spores, 623
Steroids affecting bacterial growth, 767

Stilbamidine as disinfectant, 27, 33
Streptococci, nonhemolytic, from endocarditis, serology of, 393
Streptococcus bovis, amino acids inhibiting, 769
— *bovis*, nutrition of different strains, 601
— *salivarius*, serology of, 393
Streptomyces bikiniensis, description, 323
— *griseus* producing antibiotic grisein, 739
Streptomycin assay disturbed by salts, 25
— detection by paper strip chromatogram, 231
— from *Streptomyces bikiniensis*, 317
— inhibiting formation of adaptive enzymes, 765
—-requiring strain of *Mycobacterium ranae*, 459
—-resisting strain of *Staphylococcus aureus*, 139
Subtilin assay method, 545
— fastness acquired *in vitro*, 463
Sulfa compounds, bacteriostatic action increased by neutral chemicals, 277
Sulfathiazole increasing riboflavin formation, 833
Sulfhydryl enzymes inactivated by chlorine, 451
— group of antibiotics controlling induced resistance, 139, 175
Sulfonamide bacteriostasis, cause of delay, 503
Sumac, antibiotic from, 607
Syphilis infection aborted by penicillin and bacitracin, 341

Taxonomy, new code of nomenclature, 287
Temperature affecting tetanus toxin production, 421
Tetanus toxin production affected by temperature, 421
Treponema pallidum affected by bacitracin and penicillin, 341, 347
— *pallidum* affected by subtilin, 357
Trichomonas foetus favored by *Vibrio fetus*, 85
— *vaginalis* requiring two blood fractions for growth, 169
Tryptophan as cofactor for bacteriophage adsorption, 637, 651
— deficiency decreasing effects of encephalomyelitis, 89
— preventing inhibition by other amino acids, 772
Tween causing bacteriostasis, 11

Ultraviolet, resistance to increased by preirradiation, 369

Vibrio fetus favoring *Trichomonas foetus*, 85
— *fetus* infecting man, 113
— *oxaliticus* n. sp., 359
Virus diseases diagnosed with electron microscope, 45
— interference: pneumonitis vs. psittacosis virus, 627
Vitamin recovery from bacterial cultures, 693

Yeast, alcohol tolerance, 53
